Property Description

Distinctive jungle cheek architecture developed by local architect Donald Loria of Prendas Loria Architecture, the same designer who designed the recently renovated Lagarta Lodge and many luxury homes here in Nosara. The home was designed with an open floor-plan taking advantage of the hillside location, ocean views and surrounded by protected green space to the east and west of the property. The inside spaces open up to the outdoors allowing you to live in harmony with the surrounding jungle preserve and enjoy a direct walking path to two beaches, Playa Guiones and Playa Pelada. As an added bonus, the home has its own wellness spa equipped with a sauna, whirlpool, mini fitness room and a yoga deck. For additional information about this amazing luxury property, please do not hesitate to contact Jim Ewing at jim@surfingnosara.com.
