Property Description

Perched near the summit of Playa Flamingo's south ridge, Casa Visión is an extraordinary luxury estate with a stunning design, completed in 2025. This palatial home offers breathtaking views of the waves rolling on to Playa Conchal and Brasilito, thanks to its unique vantage point. Flamingo's south ridge is an ultra-exclusive hillside enclave where neighboring residences are among Costa Rica's finest. And Casa Visión claims one of the ridge's most dramatic perspectives—an irreplaceable panorama that defines the essence of coastal luxury. The home features seven suites, each with its own en suite bath. Among them, a fully independent apartment boasts spectacular ocean views, ideal for long-term guests or staff. At the center of the estate is a palatial living room: a soaring, two-story space crowned by a wood-paneled dome with inset lighting. Flanking staircases rise elegantly on either side, leading to second-floor suites that frame the cathedral-like great room.
