Property Description

This beautiful modern home features a prime location tight above Playa Dominical. Only a five minutes driving to highway a few more to main towns Dominical and Uvita. The construction (Inside 2,193 sq. ft. / Outside 1,488 sq. ft.) on this beautiful home was brilliantly implemented utilizing high quality materials and modern building techniques. The main concept for the design was to enhance the incredible Costa Rican environment on the property and the end result hits the mark perfectly. The home has a great flow with an open layout that creates a seamless marriage between comfort and pure luxury. With vaulted ceilings, elevated windows and folding glass doors, each room can be completely opened up to the outside where guests marvel at jaw dropping views of the rainforest covered coastline and the world famous "Whale's Tail" reef formation at Marino Ballena National Park. The home is privately set back off of the main road via a long driveway with an electronically controlled gate.
